# GARDENING

## SPEAKER SERIES

All workshops are In-person at the Brooklin United Church, 19 Cassels Road East, Whitby

### Invasive or Aggressive? What's the Difference?

**March 25 at 7:30 p.m.** | Speaker: Art Vanden Enden

Art will share garden wisdom from his 44 years in the business. He'll identify invasive and aggressive plants and help you decide how—or if—to manage them. Is it worth keeping? How much time does control take? He'll also cover plant sales, resale ethics, and whether advice from garden centres, big box stores, and friends can be trusted. Art will answer all your questions.

### Unexpected Pollinators

**April 22 at 7:30 p.m.** | Speaker: Helen Battersby

A pollinator garden is full of surprises. Pollinators are animals that move pollen between plants. Bees, butterflies, beetles, flies, hummingbirds, bats, small rodents and lizards. Meet the good guys and sometime the bad guys and how to keep them happy. This picture packed presentation will get you all abuzz for pollinators.

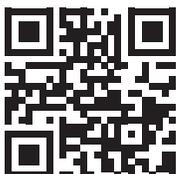

### The Importance of Food Security

**May 27 at 7:30 p.m.** | Speaker: Carson Arthur

Carson talks about the disruptions of the global supply chain. Food security exists when all people, at all times, have physical access to sufficient safe and nutritious food. Now is not the time to take this for granted!

Brooklin-Whitby Garden Club Plant Sale | Saturday, May 23 at Grass Park, 41 Baldwin St., Whitby from 9 a.m.-1 p.m.
